

Maintenance & Care

When purchasing from us we recommend keeping up with a good cleaning routine to guarantee a long life for the furniture. We recommend our customers use light soap such as dawn dish soap or a natural soap that does not have harsh chemicals that can damage the furniture's protective layers. To ensure a good clean use a rag or brush with the desired soap and wash away with water. Do not leave any harsh products on the vinyl or sling; this will only age it. Even though our products are designed to be left in the sun's harsh rays and outdoor climate we still recommend using a towel when sunbathing with any oils or sunscreens on the skin.

Maintenance and care for A&K Enterprise's outdoor furniture!

Key tips for maintaining your patio furnitures lifespan:

Cleaning:

- Use mild soap, like Dawn dish soap or a natural soap, to avoid damaging the furniture's protective layers.
- Wash with a rag or brush and rinse thoroughly with water.
- Aluminum: Wash aluminum furniture with soapy water every three weeks or more often if needed. Use a mild detergent and a soft rag or brush. Rinse thoroughly with clean water. You can also wax the aluminum frame with a light coat of car wax to protect it from the elements.
- Vinyl/Sling: Clean vinyl straps with a mild soap and water solution. Avoid using harsh chemicals, as these can damage the vinyl. Rinse thoroughly with clean water and allow to air dry completely.

Sun Exposure:

- While the furniture is designed for outdoor conditions, oils and sunscreens from sunbathing can be damaging if left on the furniture for too long.
- Place a towel on the furniture before sitting or lying on it. This will help to protect the furniture from sunscreen, body oils, and lotions.

Additional Tips:

- Store furniture indoors during the off-season. If you live in an area with harsh winters, bring your furniture indoors for storage. This will protect it from snow, ice, and freezing temperatures.
- Always use your furniture for its intended purpose only. Don't stand or jump on, flip over, or lean back in chairs or lounges.
- To move furniture, always pick it up. Don't drag it across the ground, as this can scratch or damage it.
- Avoid excessive weight on the furniture that could exceed its capacity. Our furniture's weight capacity: 250-325 lbs depending on the product.

By following these simple tips, you can significantly extend the life of your patio furniture and keep it looking beautiful for years to come!
